

4-channel measurement and control device in modular design

- ▲ Chemical-resistant housing for wall mounting or control cabinet installation
- ▲ 5.5" TFT-colored touch screen
- ▲ Large clamping space
- ▲ Acquisition and processing of up to 4 measured variables (Conductivity, pH, Redox, Cl, ClO₂, PAA, ...)
- ▲ Features per channel:
 - 1 analysis input
 - 1 temperature input
 - 1 release input
 - 1 freely programmable controller
 - 1 or more control outputs
 - 1 standard signal output (0/2 - 10 V or 0/4 - 20 mA)
- ▲ PC configuration software for device configuration via prearranged setup screens
- ▲ Bi-directional data transfer via RS 485 or USB interface (standard), alternatively via Ethernet (LAN) interface or USB data stick (optional)

The measurement and control device Versatronic provides in addition to the simultaneous processing of up to 4 measurement and control channels, also various communication interfaces such as RS 485, Profibus, USB, Ethernet.

System states can be called-up via remote access at any time by an integrated web server.

A paperless recorder (optional) is able to record all measured values and switching states during a period of up to one year. By using an extensive evaluation software, the recorded data can be analyzed and visualized comfortably.
